

SHIMPO'S TECHSTROBE

A **Nidec** Group Company

HANDHELD BATTERY OPERATED STROBOSCOPE

The **TechStrobe** from Shimpo Instruments is the perfect tool for slow motion, or stop action stroboscopic inspection. The Shimpo **TechStrobe** is the only palm size unit to include a *Phase shift* feature. *Phase shifting* allows the **TechStrobe** operator to advance or retard the flash timing by degrees of angle, without changing the actual flash rate (FPM) of the **TechStrobe**.

Employing its unique *Phase shifting* feature, the **TechStrobe** "freezes" rotating or reciprocating machinery for visual inspection of covered gear teeth, shafts, oil/fuel/ink injector patterns, and print media; all without stopping production.

The **TechStrobe** is completely portable and operates up to 2.5 hours at 1600 FPM from its detachable, rechargeable battery. The ergonomically designed battery serves as the padded grip area. The battery is quickly detached and recharged while another battery is snapped into place.

Designed for right or left hand, all **TechStrobe** functions are intuitive and easy to use. Quality and Maintenance Professionals will appreciate the rotary and push button controls for internal flash (FPM/RPM) control, external triggering, tachometer mode and *Phase shift* control. The push buttons rapidly increase (x 2), or decrease (÷2) the flashes per minute (FPM) and change by degrees the *Flash phase*.

Compact, impact resistant and rugged, with that balanced feeling for one-handed operation, the **TechStrobe** will quickly become one of the Quality and Maintenance Professionals' favorite tools.
