

Applications & Solutions Lightsources

We sell the Welch-Allyn 24W SOLARC® lightsource which is ideal for the small fiber bundles found in our scopes. This comes standard with an ACMI port. We add our own attenuator design to improve the low light cutoff. The lamp is a proprietary Welch-Allyn product. The power supply is an external transformer which is 120/240 AC input and 12V DC, 4A output.

We also sell the Schott 150W ACE-1 halogen source for more general use. This comes with an aluminum adapter that has a bore that can be adapted to any size fiber bundle. The lamp is an EJA 12v, 150W. The power input is 120VAC
